

J-Bridge

Bridge + firewall

Defaults for Jade Networks products,

IP : 10.0.100.1, Password : jade

or

Connect a monitor and a keyboard to the device and boot device in "Reset to defaults" mode and follow the instruction on screen.

Installation process

place J-Bridge device between 2 switches like so. This is the most common way of installation.

Note : Change the default password as soon as possible.

Minimal requirement for all Jade's software. Windows 2k and up.
Install J-Bridge.exe on your windows computer, follow on screen installation instructions.

Configs via J-Bridge.exe

Connect the your device, click menu/Tools/Change IP address.

Changing the IP address

click menu/Bridge Config/IP config

Config

Device : 10.0.100.1

J-Bridge IP

IP Address : / 24

Ok Cancel

Quick Start Guide

Changing the Password

click menu/Tools/Change Password

Ch Passwd

New Passwd :

Confirm :

Ok Cancel

Adding firewall rules

Add Firewall Rules

Command : Add Target : FORWARD

Rule No :

Protocol : TCP/IP : IPv4

Source IP : S Mask : S Port :

Destin. IP : D Mask : D Port :

OutGoing : InComing

Action : ACCEPT

Ok Cancel

No worry, if entering a rule that will block you from having access to the device. J-Bridge needs a confirmation to accept the rule. If for any reason, new rule blocks access, J-Bridge will revert to the latest working configurations within a minute, giving you back access to the device.
